**Telephone:** +45 28 49 30 05

**Education:**  
Master's degree in Interaction Design  
from Aalborg University (AAU)

## About me

---

I have a Master's degree in Interaction Design from Aalborg University (AAU) and I am looking for a job as Interaction Designer, UI/UX Designer or front-end developer. I have a broad interest in software design, including user research, idea development, prototyping, implementation, and evaluation. I am curious about technology, analytically minded and enjoy being challenged and developing new skills. Through problem-based learning I have experience in identifying, understanding and solving a wide range of problems. My background qualifies me to contribute to complex development projects within software and design.

## Education

---

### 2021 - 2023 **Master's degree in Interaction Design**

- Contents
  - Design studio methods
  - Mobile applications development
  - Multimodal perception and cognition
  - Software innovation

### 2018 - 2021 **Bachelor's degree in Interaction Design**

- Contents
  - Design understanding
  - User-centered design
  - Fundamental programming in php, css, html
  - Modeling technique and rendering methods in 3D
  - Imperative programming in C
  - Object Oriented Programming in C#
  - Interactive physical design
  - Database development
  - System analysis and design

# Work experience

---

## 2019 - 2023 **Gymnastics instructor at DGI-huset Nordkraft**

I taught gymnastics for children aged 6-15 at DGI-Huset Nordkraft's Kidfit teams. I also facilitated events where the children come to play on the trampolines and other equipment.

## 2020 - 2020 **Assistant teacher for the course "Imperative programming in C" at AAU**

I took this course as part of my degree and a year later I was invited to become an assistant teacher for the course. After each lecture, it was my responsibility to help the students understand and complete assignments related to the course.

# Skills

---

## Design

Through my education, I have gained a deep understanding of many different aspects of Interaction Design, such as:

- User-Centered Design
- Participatory Design
- Usability Testing
- Prototyping
- UX Research (Qualitative and Quantitative)

I am also an experienced user of:

- Figma
- Photoshop
- Miro
- Adobe XD

## Programming

I have experience with different programming languages:

- HTML
- CSS
- Javascript
- C (Imperative)
- C# (Object-oriented)
- Java (Android)

# Portfolio

---

You can find the projects I have worked on during my education in my portfolio.
