About me

I have a master's degree in Interaction Design from Aalborg University (AAU) and am looking for a job as an Interaction Designer, UI/UX Designer or front-end developer. I have a broad interest in design, including user research, idea development, prototyping, implementation and evaluation. I am curious about technology, analytical and enjoy being challenged and developing new skills. Through problem-based learning, I have experience in identifying, understanding and solving a wide range of problems. My background qualifies me to contribute to complex software and design development projects.

Education

Bachelor in Interaction Design
2021 - 2023 at Aalborg University (AAU)

Bachelor in Interaction Design
2018 - 2021 at Aalborg University (AAU)

Professional experience

Gymnastics instructor
2019 - 2023 at DGI-Huset Nordkraft

I taught gymnastics for children aged 6-15 at DGI-Huset Nordkraft's Kidfit teams. I also facilitated events, where children came and played on the trampolines and other equipment. My primary areas of responsibility were within safety and teaching.

Assistant teacher for the course "Imperative programming in C"
2020 - 2020 at Aalborg University (AAU)

I took this course as part of my education and a year later I was invited to become an assistant teacher for the course. After each lecture, it was my job to help the students understand and complete assignments related to the course. In addition, I was responsible for giving feedback on written programming submissions.
